EXPERIENCE

Full Stack Web Developer

Coincent

Jun 2024 - Aug 2024

Remote

- Engineered an intuitive front-end to back-end linkage platform using React, MongoDB database and RESTful API.
- Developed an authentication system. Orchestrated the front-end display with ReactJs and other libraries.
- Orchestrated seamless communication between front-end and back-end, integrating Rest API and optimizing the loading time by following efficient coding practice.

PROJECTS

Marketing Hub | *ReactJS, HTML, Tailwind CSS, MongoDB, NodeJS, ExpressJs, Cloudinary*

[GitHub](#)

- Designed and implemented a robust platform that enables influencers to manage and track promotional campaigns across multiple social media platforms, including Instagram, YouTube, and Twitter, enhancing visibility and engagement metrics for clients' products.
- Developed a real-time messaging system using Socket.IO, facilitating seamless communication between influencers and clients, thus streamlining collaboration and feedback processes within the platform.
- Leveraged Instagram API, YouTube Data API v3, and Twitter API to seamlessly fetch and display influencer content, engagement metrics, video performance data, and tweet-level metrics, enhancing the platform's ability to track and analyze social media campaigns.

Institute Placement Portal | *Ejs, HTML, CSS, NodeJS, ExpressJs, MySQL*

[GitHub](#)

- Developed a comprehensive platform facilitating interaction between recruiters and students within the institute, ensuring exclusivity and security.
- Admin panel equipped with 100% authority in managing student and recruiter profiles, ensuring data security.
- Introduced a novel feature enabling recruiters to access resumes of non-applicant students.
- Utilized MySQL for database management, ensuring robust data storage and retrieval.

Movie DB | *ReactJS, TMDB API, HTML, Bootstrap, CSS, Git, Vercel*

[GitHub](#)

- Developed a web application using ReactJS and RESTful APIs of TMDB API in the front end that facilitated the seamless retrieval of data from APIs.
- Implemented features such as dynamic search, and movie categorization.
- Optimized API calls and data rendering, reducing the app's load time and enhancing overall user experience.
